

NOTICE

TO: ALL ROLAND PARK COUNTRY SCHOOL STUDENTS, PARENTS & EMPLOYEES

FROM: Duncan Booth, Director of Finance

DATE: October, 2009

SUBJECT: Asbestos Survey & Management Plan for Roland Park Country School

Roland Park Country School is required by law to report annually to you the following information with respect to asbestos containing material.

In 1988, RPCS had an asbestos survey conducted for compliance with the U.S. Environmental Protection Agency's 40 CFR, Part 763 Asbestos Containing Material in School; Final Rule Notice. A management plan was developed for the School by an accredited management planner in compliance with the EPA for managing the remaining asbestos containing materials in the School. The remaining asbestos containing material is located in pipe chases in the crawl space of the Ward House. This material is encapsulated and in good condition. Periodic inspections are conducted by qualified professionals to ensure that it remains in good condition.

The survey and management plan are available in the Business Office for those who wish to inspect it. Should you have any questions, please feel free to contact me at 410-323-5500.
