

So, you have been studying about animals! Can you guess what I am?

You guessed it!
I'm an **amphibian**!

Amphibians . . .

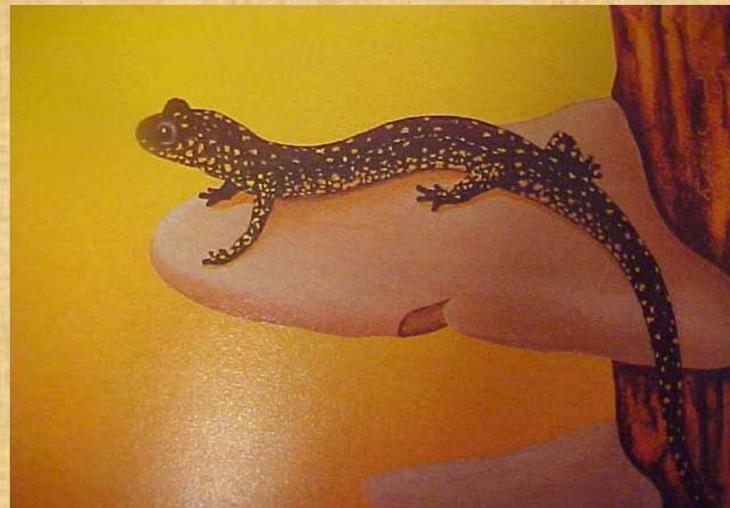

- live part of their lives in water and the other part on land
- are vertebrates- have backbones
- are cold blooded- body temperature depends on the temperature of the environment
- return to the water to lay eggs.

Salamanders and Newts

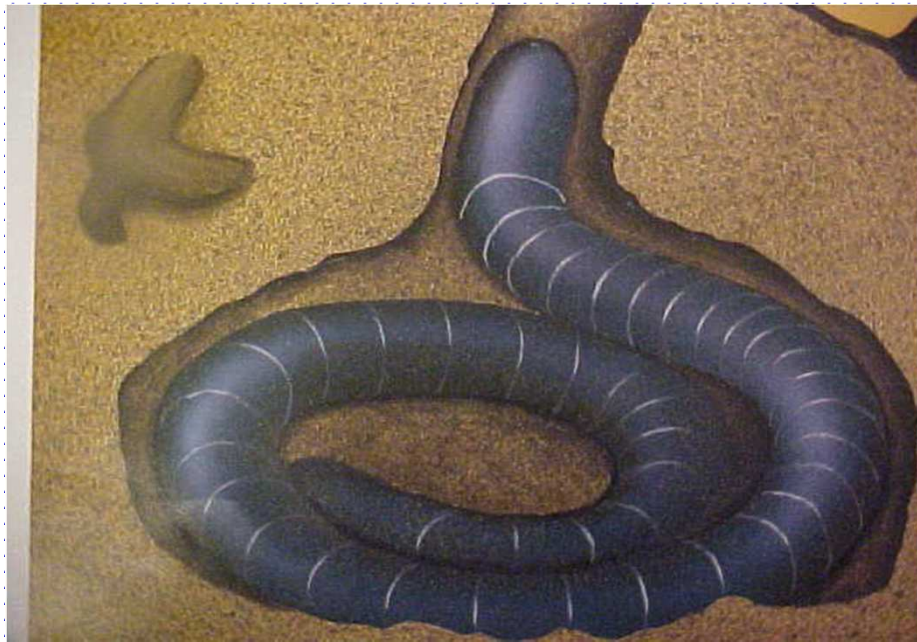

(brightly colored Salamanders)

- Keep their tails as adults.
 - Have 4 legs

Caecilians

- A worm like amphibian

Frogs and Toads

- Lose their tails
- Eat insects, fish, and worms
- Go through metamorphosis
