

Insects

Where can you find them?

Insects can be found anywhere in the world from tropical rainforests to polar regions!

How many different kinds are there?

- Millions!! And some haven't even been discovered yet!

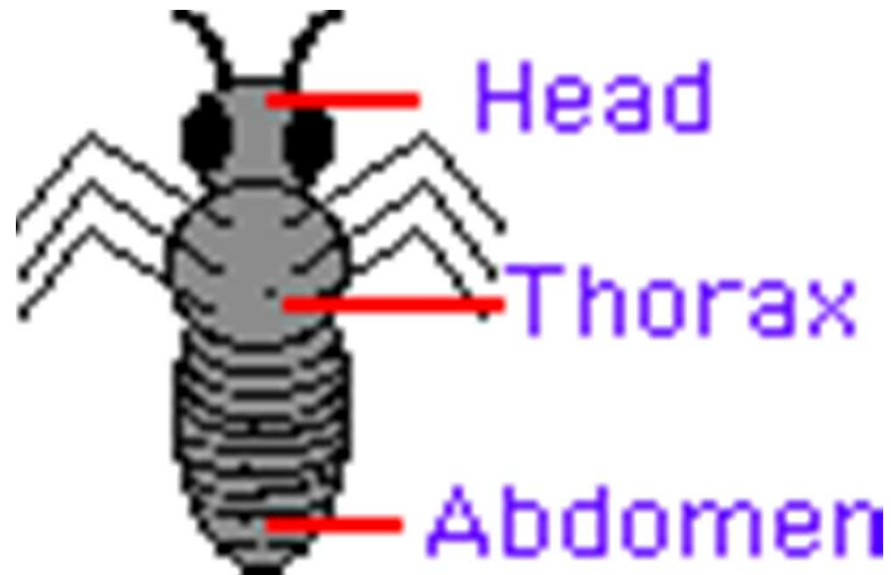

Characteristics

Insects:

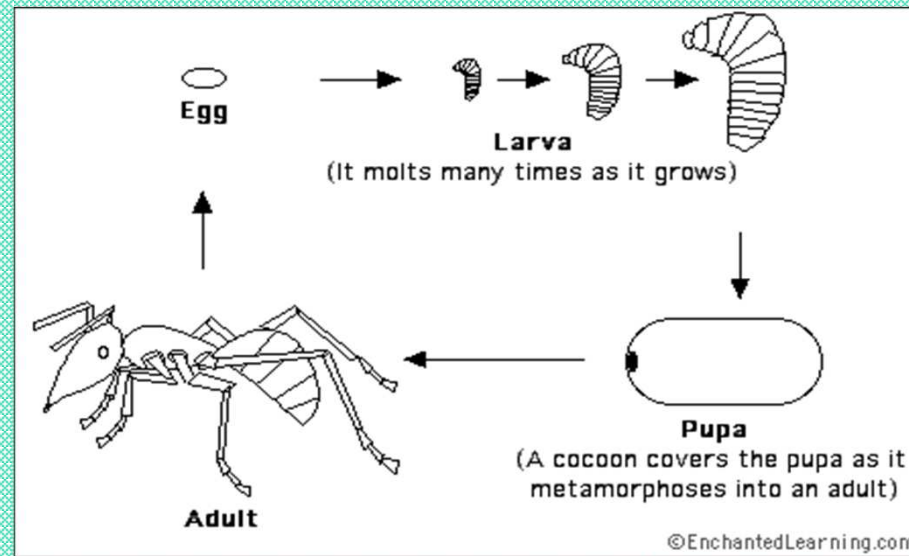

- Are invertebrates
- Have an exoskeleton
- Breathe through holes called spiracles
- Have 6 legs
- Have compound eyes
- Don't live very long lives

Thorax . . . Abdomen . . . What's that?

- Insects have 3 body parts:
 - Head
 - Thorax
 - Abdomen

Oh! What a cute baby ant!

- Insects go through metamorphosis
- Their babies look different than the adult insect
- They have a 4 stage life cycle.
- They lay **many** eggs!
